the future is calling

## Integrated Computer Telephony for GoldMine®

- Enables a standard (analog) telephone line to work with Power Dialer for GoldMine®.
- Enables a standard (analog) telephone line with CallerID to work with Tapi Link for GoldMine® screen-popping.
- Requires no additional hardware to work with Call Recorder for GoldMine®
- Ideal for SOHO users without telephone systems.
- Perfect for VARs wishing to demonstrate the technology.
- Fully TAPI compliant device for exceptional call control.
- Telephone handset port and headset port.

## Standalone, companion hardware to our CTi products

For users seeking to take advantage of the benefits that Computer Telephony offers, it has always been difficult to find hardware that can be used with standard telephone lines such as those in most homes or small offices

Now, with the Hi-Phone Desktop, this functionality can be purchased at a fraction of the cost of alternative solutions previously available.

This compact device is also ideal for resellers wishing to demonstrate CTi technology.

It is the perfect device for end-users without telephone systems that wish to implement Computer Telephony.

It is also suitable for companies wishing to evaluate the benefits of Power Dialing without the need for expenditure on telephone system upgrades.

The Hi-Phone Desktop is compatible with all analog telephone lines including Centrex lines and analog extensions on telephone systems. (CallerID is required for screen-popping.)

The Hi-Phone Desktop is fully compliant with the Microsoft® TAPI standard, ensuring a reliable and easy-to-use solution based on established industry standards.

- \* Low roll-out costs.
- \* Small footprint – palm size.
- \* Plug & Play compatible.
- \* LED display for power, ring, on/off hook etc.
- \* Hands-free use (headset compatible – no handset required).

Ideal for small to medium businesses, remote offices, tele-workers, remote call-centre agents, and individuals seeking quality voice connection for their home office.
